

## Harbour View Crematorium

**Market Sector:** Private Sector, Crematoria

**Client:** Tapper Funeral Service

**Main Contractor:** Glossbrook

**Project Value:** £224,000

### The brief:

DEWCO were appointed to provide full mechanical design and fit out for this new crematorium building in Dorset. Set within the extensive grounds of the Woodland Burial Centre overlooking the open countryside beyond, this almost subterranean building was designed by local architects to encapsulate a spiritual identity appearing as the natural landscape complete with a tranquil shallow moat opening onto a reflective pool. Careful consideration was taken throughout all stages of this project to ensure a light, airy and non invasive feel to all public areas.

### Our services:

- Underfloor Heating
- Natural Gas System
- Domestic Water Services
- Dry Risers
- Automatic Irrigation
- Combustion air to cremators
- LTHW Heating
- BMS System
- Mechanical Heat Recovery Ventilation
- Mechanical Extract Ventilation
- Comfort Cooling
- Out of hours operation
